

Micro-Channeling with ProCell

One of our most-asked-about procedures uses your body's own healing serum to rejuvenate your skin, with virtually no downtime.

Looking for a quick way to improve the appearance of fine lines/wrinkles, scars, stretch marks, sagging skin & more, that has **LASTING RESULTS**? Then, a Procell Micro-channeling treatment is the ideal solution for you!

A single treatment creates thousands of microchannels. With each micro-injury, an inflammatory healing process begins, which initiates the formation of new collagen.

The application of Human growth-factor serums (Stem Cells), during the procedure, promotes scar-less healing with minimal inflammation and facilitates collagen growth.

Micro Channeling has many benefits in treating the following skin problems; such as uneven skin tones & texture, fine lines & wrinkles, acne scars/ surgical scars, stretch marks, enlarged pores, hyperpigmentation, rosacea, dull-looking skin, loss of elasticity, including neck, arms, & legs

Depending on your lifestyle Procell Micro-Channeling procedures last between 2- 10 years
